

POSITION: EXPOSURE DATA MANAGER (FULL-TIME, 18 MONTH CONTRACT)

LOCATION: ASHTEAD, SURREY

SALARY: EQUIVALENT TO c. £40K p.a.

START DATE: JANUARY 2011

An exclusive opportunity has arisen for an Exposure Data Manager within ecityrisk - an industry-leading provider of data and services to the financial services industry.

A fast-paced, innovative and vibrant company, we are looking for a sharp recruit with initiative, drive and inherent insurance industry knowledge looking to develop their career in the market.

At the centre of a cross-market initiative, they will be expected to manage the collection, transfer and storage of insurance exposure datasets between clients (including brokers, underwriters, loss modellers and executives) and an IT development team. An understanding of data quality issues with respect to exposure data is a must and familiarisation with Solvency II requirements would be beneficial. The successful candidate will spend some time immersed with clients, and therefore should be confident, articulate and knowledgeable in client-facing consultations and presentations.

The following skills are pre-requisites for this position:

- Domain experience in the insurance and re/insurance industry.
- Experience with RMS and/or AIR exposure data management.
- Database skills (including SQL Server data).
- Familiarity with exposure geocoding issues.
- Excellent communication skills, both written and verbal

At the centre of a cross-market research initiative, this is a unique opportunity for career development in catastrophe loss modelling and Solvency II. The recruit will have unique market exposure and will forge links with several ongoing market initiatives. Working hours can be flexible.

If this sounds like you, please contact Erin Norris at jobs@ecityrisk.com.
